ADOPTION INQUIRY

Each of the Border Collies at GHF are individuals with very distinct histories and personalities. We feel very strongly that the pairing of canine and human is a spiritual connection built on love, respect and deep appreciation for the gifts a Border Collie has to give, based on the life they have already led before coming to rescue. Their next step requires finding someone who will adjust TO them vs asking them to change and adjust to be something they are not or cannot be. This is why we work diligently to match the environment they are used to as well as the type of home they have already experienced and of course, what makes them the happiest.

Please take time to give us a bit of understanding about you and your situation. If we feel there might be a Border Collie here, we are happy to talk at length about them and about your hopes in adopting.
